

for $y \in \{ \log(\mathbf{reward}), \log(\mathbf{duration}) \}$:

for $k = 1, \dots, K$:

$\text{train} \leftarrow \{ i : \text{fold}(i) \neq k \}$

Fit ML learner on $(X_i, y_i)_{i \in \text{train}}$

Predict $\hat{y}_i$ on fold k (out-of-sample)
